BEAUTIFUL INFORMATION
Cancer patient tracking

System agnostic: working with InfoFlex and Somerset locally (Trust) and regionally (across a cancer network/alliance)

A flexible framework so it can be configured to your requirements

Available on any device to any clinician or manager across networks

Compatible with other Beautiful Information solutions
Cancer data process
(working with Somerset or Infoflex)
Cancer network PTL 62-day pathway demo

- Displays key steps in the patient’s cancer pathway. Column headers with fields allow users to filter.
- Highlights days wait, inter-provider transfers and patients with faster diagnosis completed.
- Right-hand columns are manually updated, via the PTL, for staff tracking.
PTL Features

The left-hand arrow opens up a window to show full details, and allow users to add comments, statuses, etc.
PTL features

The clipboard icon under ‘Pth’ shows pathway steps and dates

**Pathway Tracker: Upper GI: 9873301976 - DESALVO, ANDREW**
Faster diagnosis pathway

- Displays key steps in the patient’s faster diagnosis pathway. Column headers with fields allow users to filter.
- The screen highlights whether the pathway has been completed, how long it took (or is currently waiting) as well as the details on pathway completion.
- Right-hand columns are for user entry.
Recent treatments

- Displays key steps that made up the treatment pathway
- The summary bar at the top highlights the recent performance against the three 62d standards (treatments, screening and consultant upgrades)
- Displays key milestones and date/location, days wait, transfer info plus circle icon for completion. The pathway icon allow users to see all actions broken down.
Cancer Dashboard

- Summary view of key metrics across the region
- Available anywhere on mobile devices
- Links through to filtered PTL view
- Updated in real-time
Benefits

LIVE OVERVIEW ACROSS A NETWORK:

-A live, intuitive, online overview of the patient journey available to managers and clinicians across a regional network.

-Patients cannot ‘fall down the cracks’ between different services and clinicians. Key dates are set and alerts are triggered to ensure delays are addressed.

This DOES NOT EXIST in any other cancer region of the UK
Benefits

PROMOTE SHARED RESPONSIBILITY:

- It connects all the managers and clinicians involved in a patient’s treatment and allows them to record and monitor the referral, diagnosis and treatment pathway.

- It identifies who is responsible for each part of the treatment process and when it is due.
Benefits

TROUBLESHOOT DELAYS:

-The patient tracker view can be filtered to show different cancers and any ‘delayed’ patients.

-This prevents any serious backlog building-up unnoticed. This has been a serious national challenge.
